

Practical 08

Final Task:

To design and implement a **Gym Admission Form** with **comprehensive form handling and live validation** using **JavaScript events**, **form properties**, and **HTML5 validation features**.

Task Description:

You are required to **build a complete Gym Admission Form** that dynamically validates all user inputs both **in real time** (while typing) and **on submission**.

Your form **must** include:

- All core HTML5 input types (text, email, number, date, password, checkbox, radio, select, file).
- All key **form events** (onsubmit, onblur, onchange, oninput, etc.).
- **Custom validation messages** using `setCustomValidity()`.
- Use of **JavaScript form object properties**, including `.elements`, `.value`, `.checked`, `.length`, `.action`, `.method`, `.name`, etc.
- **Live (real-time)** validation messages that update as the user types.

Form Fields (Minimum Required):

Field	Type	Validation Rules
Full Name	text	Required, min 3 chars, only alphabets
Email	email	Valid format, required
Age	number	18–60 only
Gender	radio	Required
Membership Type	select (e.g. Monthly, Quarterly, Yearly)	Cannot be default option

Password	password	Must contain uppercase, lowercase, number, and special character
Confirm Password	password	Must match Password
Phone	text	Only digits, exactly 10 digits
Date of Birth	date	Not in the future
Profile Photo	file	Only .jpg/.png, ≤ 1MB
Terms & Conditions	checkbox	Must be checked

JavaScript Requirements:

Your JavaScript must demonstrate **ALL** of the following:

1. Accessing Forms and Elements

Use both `document.forms["formName"]` and `getElementById()` in different parts.
Display total number of form elements (`form.length`).

2. Form Events:

`onsubmit` → prevent submission until all fields valid.
`onblur` → show warning when a field loses focus and is invalid.
`onchange` → validate dropdowns and checkboxes.
`oninput` / `onkeyup` → live validation for fields like name, email, password.
`oninvalid` → show custom error messages.
`onreset` → clear all live validation messages.

3. Validation Techniques:

Required field check (`trim()` based).
Data type validation (`isNaN`, regex for text-only fields).
Range and length validation (for age, password).
Regex-based pattern matching (for email, password, phone).
Comparing fields (passwords).
Checkbox / radio selection check.
Dropdown validation.

File upload validation (type + size).

Date validation (no future DOB).

Custom messages with `setCustomValidity()` and `reportValidity()`.

4. **Live Error Display:**

Each input must have a small `<span>` or `<div>` below it that displays the current validation status in real time (e.g.  Valid /  Error).

Errors must disappear immediately when corrected.

5. **Final Form Submission:**

On successful validation, form should show a confirmation message like:

“Form submitted successfully! Welcome to FitZone Gym.”

Use `preventDefault()` to handle custom submission logic.

Bonus Requirements (for extra marks):

Display user’s **selected membership type**, **name**, and **email** in a confirmation preview box before final submission.

Disable submit button until all fields are valid.

Use **CSS transitions** or **color-coded validation indicators** (green/red borders).

Restrictions:

No external JavaScript libraries (e.g., jQuery, React, or Bootstrap validation).

No AI-generated or copied code every line must be self-written and explained.

You must **comment your code** clearly explaining the purpose of each validation and event.

Note to Students

This is **only a visual and behavioral reference** — not a code template. You must design your own HTML structure, write your own CSS for styling, and implement **every validation** using your own JavaScript logic.

I may test your code by:

- Typing invalid data to see if your events work.
- Checking the browser console for errors.
- Asking you to explain how each event and property works in your script.

Filling Correct Information:-

The screenshot shows a web browser window with the title 'Gym Admission Form'. The address bar shows the file path 'C:/Users/sitlab2/Desktop/prac3.html'. The form is titled 'OneAbove Gym Admission Form' and contains the following fields and validation messages:

- Full Name:** Shlok Anand. Validation: Looks good!
- Email:** shlokanand00@gmail.com. Validation: Valid email format.
- Age:** 19. Validation: Age is valid.
- Gender:** Male (selected), Female.
- Password:** [masked]. Validation: Strong password. (Progress bar shows 'Strong')
- Confirm Password:** [masked]. Validation: Passwords match.
- Membership Type:** Quarterly Plan (selected). Validation: Plan selected.

Optional Add-Ons:

☐ Personal Trainer (+ ₹5,000)

☒ Locker Rental (+ ₹500)

☒ Sauna Access (+ ₹1,000)

Total Amount: ₹10,500

Phone:

9326001280

☒ Valid phone number.

Date of Birth:

12/22/2005

☒ Valid date.

Profile Photo:

A screenshot of a web browser window. The address bar shows the file path "C:/Users/sitlab2/Desktop/prac8.html". The page content features a white card with a light blue border. At the top of the card is the "OneAbove Gym Admission Form" logo and title. Below this, a green banner displays the message "Form submitted successfully! Welcome, Shlok Anand." with a green checkmark icon.

Filling Wrong Information:-

Gym Admission Form

OneAbove Gym Admission Form

Full Name:

Sñ

X Must be 3+ letters.

Email:

sñok@gmail

X Invalid email address.

Age:

17

X Age must be between 18 and 60.

Gender:

☒ Male ☐ Female

Password:

X Password is not strong enough.

Weak

Confirm Password:

X Passwords do not match.

Membership Type:

Quarterly Plan

☒ Plan selected.

Optional Add-Ons:

☐ Personal Trainer (+ ₹5,000) ☒ Locker Rental (+ ₹500)

☒ Sauna Access (+ ₹1,000)

Total Amount: ₹10,500

Phone:

123547

X Must be exactly 10 digits.

Date of Birth:

02/12/2026

X Date cannot be in the future.

Profile Photo:

Choose File | No file chosen

X Profile photo is required.

☐ I agree to the Terms & Conditions X You must accept the terms.
